

Create a Colony

The set designer and other scenic artists built a larger than life tunnel system on our stage for our actors to rock out in. The design started with a drawing that the artists used to build the real thing.

Design your own naked mole-rat colony using paper and crayons.

Design 3 different rooms in your tunnel system for your colony.

How many mole rats live in your colony?

What are your rooms used for? Exercise? Schoolwork? Video games?

Make sure you include enough space for your mole rats to rock out on the guitar!
